

28 September 1976

MEMORANDUM FOR THE RECORD

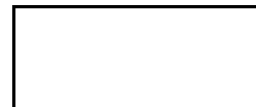

SUBJECT: Meeting with DDCI, 28 September 1976

1. Terrorism

25X1 a. After I had reviewed with the DDCI progress made with NSA and the FBI in insuring better cooperation on the terrorist target, he raised with me his own concern regarding the organization within the DDO of elements dealing with the terrorist problem. He felt that the organizational chart which he had viewed with the Senate Committee had indicated more fragmentation than he would like to see. Specifically, he asked me to raise with the DDO the question as to whether [] could be better located within the CI Staff.

25X1 b. DDCI also raised the question as to whether OCI could not make a more significant contribution to our effort in this field and he suggested as one possibility the assignment of a competent OCI analyst to [] to help with the general problem of drafting. He said he had mentioned this possibility to both Wells and Stevens and asked me to follow up with them as to their reactions.

2. I reviewed with him General Faurer's post mortem on the first running of the National Intelligence Situation Report during the Korean crisis. I pointed out that General Faurer identified two major problems--specifically, the refusal of the military to share operational planning information and the refusal of State to provide high level diplomatic traffic. He agreed that this was a problem he would have to discuss with the Director since General Faurer's recommendation involved taking this issue to the NSC for resolution.

25X

3. DDCI asked me to review a film that was made of his presentation to senior officers on current Agency policy and planning. Specifically he would like my opinion as to whether it might be useful to send this film to field stations. He added that he intended to repeat this kind of presentation once every two months.

4. DDCI also said that he was concerned about the inadequacy of space and commo equipment in the Agency Operations Center. He has asked the DDI to look into this and give him his thoughts. When he has Stevens' recommendations he intend to review them with me for the Executive Advisory Group.
